

STAFF REPORT

SUBJECT: One Year Extension to Legal Services Agreement with Hanson Bridgett LLP

FROM: Tamara Edwards, Interim Executive Director

DATE: June 6, 2022

Action Requested

Exercise the option to extend the contract with Hanson Bridgett through FY2023.

Background

In June 2013 the Board of Directors awarded a contract to Hanson Bridgett to serve as general legal counsel for the Authority. The agreement was awarded for a fixed three year term with the right to extend the agreement for seven one-year periods. The initial three year agreement expired on June 30, 2016 and has been extended through June 30, 2022. The final option year expires June 30, 2023. The terms specify that the extension price will be based on the CPI for the immediate prior calendar year.

Discussion

Michael Conneran and his colleagues at Hanson Bridgett have provided excellent legal service to this agency during the contract period. In addition to acting as legal counsel for all Board of Directors' activities, this past year, the firm has assisted staff with the preparation of numerous procurement and construction contracts, ensuring compliance with applicable funding requirements. Additionally, the firm has continued to provide guidance on general topics requiring legal compliance, such as ADA issues, employment matters and general federal procurement issues. Hanson Bridgett has monitored and will continue to monitor significant changes in federal transit policy, including revisions to charter service and school bus service regulations, and timely informed staff of proposed regulatory actions.

Recommendation

The Finance and Administration Committee recommend that the Board exercise an option year and extend the legal services agreement from July 1, 2022 through June 30, 2023.

Attachment

1. Letter to Hanson Bridget Exercising Agreement Option
2. CPI Index (All Urban Consumers, All Items for the San Francisco Area)

Attachment 1

June 6, 2022

Michael Conneran
Hanson Bridgett LLP
425 Market Street, 26th Floor
San Francisco, CA 94105

Dear Michael:

On July 1, 2013 LAVTA entered into an Agreement with your firm for the provision of legal services. In accordance with this Agreement, specifically, Attachment 1, Section II, 1.3, the initial period of the contract ended June 30, 2016, and LAVTA has sole discretion to extend the contract for seven (7) one-year periods. This will confirm LAVTA's intention to exercise that option for the sixth "option year" and extend this contract for the period of July 1, 2022 through June 30, 2023.

In addition, in accordance with Section 4 of this Agreement, this letter also confirms the change in hourly rate for FY23.

In the past, we have used the CPI as of February, and LAVTA accepts your proposal to do that as well moving forward. We have confirmed the calculations of the CPI for each category and rounded the amount up or down to the closes \$5 (keeping the actual number for the next calculation so the rounding doesn't affect the next year's number). The CPI (for All Urban Consumers All Items for the San Francisco-Oakland-San Jose area) changed 5.2% from February 2021 to February 2022. Here are the rates for FY23 starting July 1, 2022:

Attorney Category	2022 Rate	2022 Raw Rate	2023 Rate plus CPI (raw)	Rounded Rate for FY 2023
Partner	\$420	\$419.77	\$441.60	\$440
Senior Counsel	\$370	\$369.62	\$388.84	\$390
Associate	\$345	\$344.62	\$362.54	\$360

It is a pleasure working with you.

Sincerely,

Tamara Edwards
Interim Executive Director

Consumer Price Index, San Francisco Area — April 2022

Area prices were up 1.5 percent over the past two months, up 5.0 percent from a year ago

Prices in the San Francisco area, as measured by the Consumer Price Index for All Urban Consumers (CPI-U), advanced 1.5 percent for the two months ending in April 2022, the U.S. Bureau of Labor Statistics reported today. (See [table A](#).) Regional Commissioner Chris Rosenlund noted that the April increase was influenced by higher prices for gasoline. (Data in this report are not seasonally adjusted. Accordingly, month-to-month changes may reflect seasonal influences.)

Over the last 12 months, the CPI-U rose 5.0 percent. (See [chart 1](#) and [table A](#).) Food prices moved up 10.2 percent. Energy prices jumped 31.1 percent, largely the result of an increase in the price of gasoline. The index for all items less food and energy increased 2.7 percent over the year. (See [table 1](#).)

Chart 1. Over-the-year percent change in CPI-U, San Francisco-Oakland-Hayward, CA, April 2019–April 2022

[View Chart Data](#)

Food

Food prices rose 1.1 percent for the two months ending in April. (See [table 1](#).) Prices for food at home advanced 1.7 percent, led by higher prices for meats, poultry, fish, and eggs (7.3 percent) and dairy and related products (6.3 percent). Prices for food away from home advanced 0.3 percent for the same period.

Over the year, food prices rose 10.2 percent. Prices for food at home jumped 13.9 percent since a year ago. Increases across food at home expenditure categories ranged from 6.8 percent for fruits and vegetables to 19.3 percent for meats, poultry, fish, and eggs. Prices for food away from home increased 6.0 percent.

Energy

The energy index jumped 13.5 percent for the two months ending in April. The increase was mainly due to higher prices for gasoline (20.4 percent). Prices for electricity increased 8.6 percent, but prices for natural gas service declined 1.8 percent for the same period.

Energy prices jumped 31.1 percent over the year, largely due to higher prices for gasoline (43.0 percent). Prices paid for natural gas service rose 23.4 percent, and prices for electricity increased 18.2 percent during the past year.

All items less food and energy

The index for all items less food and energy rose 0.7 percent in the latest two-month period. Higher prices for other goods and services (3.2 percent) and medical care (1.0 percent) were partially offset by lower prices for apparel (-2.4 percent), recreation (-2.1 percent), and used cars and trucks (-2.1 percent).

Over the year, the index for all items less food and energy increased 2.7 percent. Components contributing to the increase included used cars and trucks (22.3 percent), recreation (8.0 percent), and medical care (3.2 percent). Partly offsetting the increases was a price decrease in shelter (-0.1 percent).

The June 2022 Consumer Price Index for the San Francisco area is scheduled to be released on July 13, 2022.

Technical Note

The Consumer Price Index (CPI) is a measure of the average change in prices over time in a fixed market basket of goods and services. The Bureau of Labor Statistics publishes CPIs for two population groups: (1) a CPI for All Urban Consumers (CPI-U) which covers approximately 93 percent of the total U.S. population and (2) a CPI for Urban Wage Earners and Clerical Workers (CPI-W) which covers approximately 29 percent of the total U.S. population. The CPI-U includes, in addition to wage earners and clerical workers, groups such as professional, managerial, and technical workers, the self-employed, short-term workers, the unemployed, and retirees and others not in the labor force.

The CPI is based on prices of food, clothing, shelter, and fuels, transportation fares, charges for doctors' and dentists' services, drugs, and the other goods and services that people buy for day-to-day living. Each month, prices are collected in 75 urban areas across the country from about 6,000 housing units and approximately 22,000 retail establishments—department stores, supermarkets, hospitals, filling stations, and other types of stores and service establishments. All taxes directly associated with the purchase and use of items are included in the index.

The index measures price changes from a designated reference date; for most of the CPI-U the reference base is 1982-84 equals 100. An increase of 7 percent from the reference base, for example, is shown as 107.000. Alternatively, that relationship can also be expressed as the price of a base period market basket of goods and services rising from \$100 to \$107. For further details see the CPI home page on the internet at www.bls.gov/cpi and the CPI section of the BLS Handbook of Methods available on the internet at www.bls.gov/opub/hom/cpi/.

In calculating the index, price changes for the various items in each location are averaged together with weights that represent their importance in the spending of the appropriate population group. Local data are then combined to obtain a U.S. city average. Because the sample size of a local area is smaller, the local area index is subject to substantially more sampling and other measurement error than the national index. In addition, local indexes are not adjusted for seasonal influences. As a result, local area indexes show greater volatility than the national index, although their long-term trends are quite similar. **NOTE: Area indexes do not measure differences in the level of prices between cities; they only measure the average change in prices for each area since the base period.**

The San Francisco-Oakland-Hayward, CA. metropolitan area covered in this release is comprised of Alameda, Contra Costa, Marin, San Francisco, San Mateo Counties in the State of California.

Information in this release will be made available to individuals with sensory impairments upon request. Voice phone: 202-691-5200; Telecommunications Relay Service: 7-1-1.
